# Summary

1. This document describes the 2020-21 Student Loans Company (SLC) comparison files generated by the 2020-21 HESA Student data checking tool and rebuild instructions. Throughout the document, fields taken or derived from the HESA Student record are shown in capitals.
2. The purpose of this comparison is to ensure that the 2020-21 HESA data is consistent with SLC records. For each provider, we check:
  - whether all students who received student support from the SLC during the 2020-21 academic year are included in the 2020-21 HESA data
  - whether all students who are recorded as receiving SLC tuition fee loans in the 2020-21 HESA data appear in the SLC data
  - whether all students recorded in the SLC data with a withdrawal date have a corresponding end date in the HESA data.
3. The 2020-21 SLC comparison can be used by higher education providers to verify and correct their 2020-21 individualised student data before signing off the final data with HESA.
4. The SLC comparison outputs are formed of two files. These are:
  - SLC comparison workbook 'SLCCOM20\_AAA\_XXXXXXXX.xlsx'
  - SLC comparison individualised file 'SLCCOM20\_AAA\_XXXXXXXX\_IND.csv'

where XXXXXXXX is your provider's eight-digit UK Provider Reference Number (UKPRN), and AAA identifies the output type as listed in the table below.

File abbreviation	Source of outputs
DCT	Data checking tool
AST	Amendments submission tool
PCO	Post-collection outputs

Details of how to use individualised files are given on the Office for Students (OfS) website ([www.officeforstudents.org.uk/data-and-analysis/supplying-data/working-with-individualised-files/](http://www.officeforstudents.org.uk/data-and-analysis/supplying-data/working-with-individualised-files/)).

5. These files can be accessed via the Information Reporting Interface Service (IRIS) report which is available on HESA's data collection site (<https://datacollection.hesa.ac.uk/>). Access details will be sent to the appropriate contacts at providers when the data checking tool is available.
6. This document is aimed at readers with in-depth knowledge of the data. Readers are advised to refer to the HESA Student Record Coding Manual 2020-21 (<https://www.hesa.ac.uk/collection/c20051>).

- We will document any changes or corrections to the algorithms in this document on our website ([www.officeforstudents.org.uk/data-and-analysis/data-checking-tool/2020-21-hesa-student-data-checking-tool/](http://www.officeforstudents.org.uk/data-and-analysis/data-checking-tool/2020-21-hesa-student-data-checking-tool/) under 'Updates').

## Changes from the 2019-20 HESA Student data checking tool

- This section describes any changes to the algorithms since the equivalent was published for the 2019-20 algorithms in 'Student loans company comparison 2019-20' available from the data checking tool pages ([www.officeforstudents.org.uk/data-and-analysis/data-checking-tool/](http://www.officeforstudents.org.uk/data-and-analysis/data-checking-tool/)).
- Any deletions are shown with a ~~strike through~~. Any other changes are shown as **bold and underlined**.
- To account for missing student support numbers, instances returned on a Type 04 - Dormant reduced return will be linked to instance data collected in the 2019-20 HESA Student return where possible.

## 2020-21 SLC comparison workbook

- The 2020-21 SLC comparison workbook is the Excel workbook SLCCOM20\_AAA\_XXXXXXXXX.xlsx which contains the following worksheets:

**Table 1: Worksheets in the 2020-21 SLC comparison workbook**

Worksheet*	Title
Coversheet	SLC comparison summary figures

\* This worksheet reference corresponds to the spreadsheet tabs.

## 2020-21 SLC comparison individualised file

- When working through this document it is necessary to use the individualised file, SLCCOM20\_AAA\_XXXXXXXXX\_IND.csv. The individualised file contains the values of all fields used to generate the SLCCOM20\_AAA\_XXXXXXXXX.xlsx workbook 2020-21 SLC comparison figures.
- Fields taken from the HESA Student record or derived as part of the 2020-21 SLC comparison are shown in capitals using the names given in tables 2 and 3 respectively. Fields prefixed with 'SLCCOM' are derived, all others are taken directly from the HESA Student record, or SLC data, as indicated in Table 2.
- Specific instructions for rebuilding the 2020-21 SLC comparison workbook from the individualised file are provided in this document.
- The individualised file contains one record per instance (each unique combination of UKPRN, HUSID and NUMHUS) in the latest academic year. Additionally, the individualised file will contain one record per student as recorded in the SLC data, where that record has not been matched to an instance in the latest academic year.

## Description of derived fields

17. The derived fields used to generate the 2020-21 SLC comparison are listed in Table 3.

**Table 3: List of derived fields used in the 2020-21 SLC comparison**

Name	Description	Paragraph	Column in individualised file
SLCCOMHESAPOP	Identifies students in the HESA data for the provider	20	Q
SLCCOMHESASLCPPOP	Identifies students in the HESA data whose main source of tuition fees is the SLC	21	R

## Linking

18. The HESA and SLC records are linked using UKPRN and SSN. In the case that the instance is returned on a Type 04 - Dormant reduced return, instances will be linked first to the 2019-20 HESA Student record using UPKRN, HUSID and NUMHUS. From the 2019-20 HESA Student record, the recorded SSN will be used to link to the 2020-21 SLC data. The 2019-20 SSN used to link will be displayed in the individualised file as SSN1920.
